Patient experience admission kits

Creating the Ultimate Patient Experience:

- *Combine practical solutions to patients' needs with spa-like elegance and quality*
- *Provide something that patients will genuinely be happy to have with them and take home*

Generating savings far beyond their cost: HAIs and the HCAHPS survey

- **Hand hygiene improvement is essential for reducing antimicrobial resistant HAIs**
 - *All 5 kits include hand sanitizer: patients will use more when it's convenient and accessible*
 - *10% improvement in hand hygiene = \$400,000 savings for a 200-bed hospital from fewer hospital acquired MRSA cases*
 - *25% lowest-performing hospitals for HAIs punished by CMS annually, average penalty = \$480,000*
- **In 2017, Value-Based Purchasing (including HCAHPS survey) will account for 2% of all CMS reimbursement**
- *Several core components of the Re•cover series are specifically geared toward addressing concerns stressed on the 21 hospital evaluation questions on the **HCAHPS** survey.*
 - Communication with the care team & patient understanding of circumstances:
 - *Addressed on questions 1, 2, 3, 6, 7, 16, 17, 19, 20, 24, and 25 (these questions make up 52% of the hospital evaluation questions)*
 - *Care Questions Notebook is designed specifically for these questions*
 - Cleanliness and quietness:
 - *Addressed on questions 8 and 9*
 - *Hygiene items, ear plugs, sleep mask, and "Resting, quiet please" door hanger take on these questions*
 - Overall patient experience and impression of hospital:
 - *Addressed on questions 21 and 22*
 - *Each kit in the Re•cover series is built to improve patient experience and make patients feel generously taken care of by their acute care facility*

Optimizing quality and cost:

- *Each kit has default components to allow for easy purchasing, but **they can be modified or customized in any way** the customer thinks will best serve their patients and their budget*
- **The Re•cover Essentials series provides hospitals lower-cost kits while retaining Re•cover's core strengths and premium patient experience**
