# MAINTAIN PROPER TEMPERATURES

*Correctional Meal Delivery Systems*

# Self-stacking meal trays

**The bottom of each tray acts as the lid for the tray below it. Can stack in stable columns with each compartment sealed off**

## Non-Insulated Tray Systems

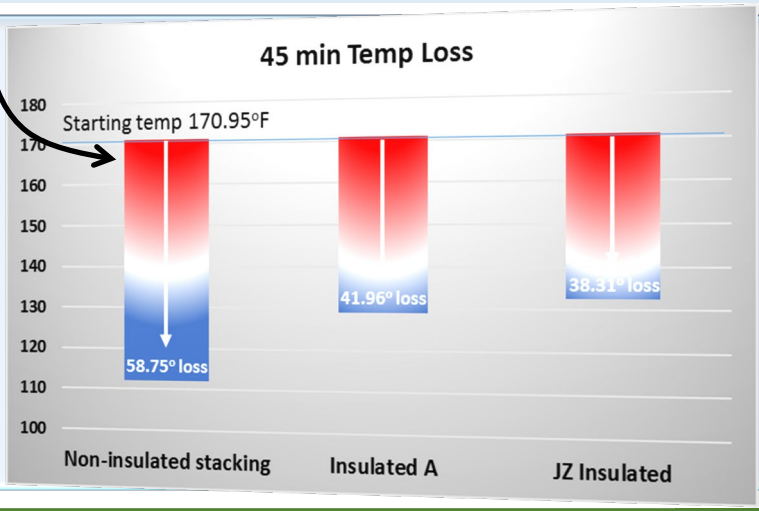
### No internal foam insulation

Pro: Won't get water logged
More durable

Con: Not insulated
Won't hold temperatures

| Tray | Item | Cavity | Dimensions |
|---|---|---|---|
|  | Hollow cavity tray is a foam insulated tray with the foam left out. All insulated trays can be ordered this way | | |
|  | Solid plastic | 5 | 14.25x9.5x1.75 |
|  | Solid plastic | 5 | 14.25x9.5x2.25 |

- Non-insulated trays lose 53% more temperature than foam insulated trays.
- A starting temp of 165°F would become 106.2°F in 45 min – deeply down in the "danger zone"
- You can take more time to deliver with insulated cart (consistently within 30-40 min)
- You can take as long as needed and deal with interruptions with heated carts



## Delivery Cart Options

**Relative capacities given for X-tray**

### Can consistently deliver less than 35 min

**Insulated Ambient Carts**

JZA-6UBT-RH
Capacity: 60

JZA-198
Capacity: 100

### Can take as long as needed to deliver

**Heated Carts**

JZH-6UBT-RH
Capacity: 60

Features removable heater

JZH-198
Capacity: 100

You can purchase an ambient insulated cart and snap in a heat box later if you decide you actually need a heated cart

# MAINTAIN PROPER TEMPERATURES

*Correctional Meal Delivery Systems*

## Self-stacking meal trays

**The bottom of each tray acts as the lid for the tray below it. Can stack in stable columns with each compartment sealed off**

## Foam Insulated Tray Systems

**When the internal space of the tray is filled with PU foam, the insulating properties allow you the full range of cart options**

| Tray | Item | Cavity | Dimensions |
|---|---|---|---|
|  | PRTS-4000 | 4 | 14.5x13x3 |
|  | PRTS-4001 | 4 | 14.5x13x3 |
|  | PRTS-5000 | 5 | 14x11x2 |
|  | PRTS-6000 | 6 | 15x13.5x2.5 |

## Delivery Cart Options

Relative capacities given for PRTS-5000 tray

### Can consistently deliver less than 20 min

**Open Carts**

Standard cart
Capacity: 102 & 136

Heavy Duty cart
Capacity: 102 & 136

### Can consistently deliver less than 35 min

**Enclosed Carts**

Standard cart
Capacity: 126

Heavy Duty cart
Capacity: 136 & 200

### Can consistently deliver less than 40 min

**Insulated Ambient Carts**

JZA-6UBT-RH
Capacity: 52

JZA-198
Capacity: 120

### Can take as long as needed to deliver

**Heated Carts**

JZH-6UBT-RH
Capacity: 52

Features removable heater

JZH-198
Capacity: 104

You can purchase an ambient insulated cart and snap in a heat box later if you decide you actually need a heated cart
